### **Search Notes**

Dwayne,  
I think applicants have a vocabulary problem. "Antithrombolytic" appears only infrequently in the databases. It would mean something that worked against clots being dissolved. I think they mean "antithrombocytic", meaning something that works against platelets (aka thrombocytes). Other possibilities are "thrombolytic" or "antithrombotic". I used all of these terms in the search.  
Barb

p.s. thanks for bundling the 3 similar searches – it was a help!
